Ready-To-Use

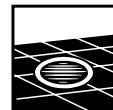

## Liquid Bacteria Digester Spotter with O<sub>3</sub>Z Odor Counteractant

*A stable liquid suspension of cultured bacteria and malodor counteractants capable of digesting complex proteins, starches, fats, oils and greases, paper, vegetable gums, hair and other organic waste. Odor control is provided instantaneously by neutralizing the malodor and eliminating the odor at its source. Billions of "nonpathogenic" bacteria in every ounce produce enzymes that degrade these organic wastes naturally. Because enzymes are continually regenerated by these bacteria, this product is much more economical and efficient than using massive doses of enzymes alone to degrade waste and eliminate the source of odors.*

### USES

- Carpet
- Drains
- Floor drains
- Sewers
- Sinks
- Showers
- Traps
- Upholstery

### BENEFITS

- Carpet and fabric care - For odor control and spot cleaning, diluted product may be sprayed directly on the source and left overnight. May be used as a laundry spotter for organic soils.
- Eliminates malodors - Restroom areas around commodes and urinals, floors and drains. Each batch is certified Salmonella free.
- Drains - The many types of bacteria in this special formulation will digest:
  - grease, fats and oils
  - paper and hair
  - laundry detergents
  - proteins and starches
- Environmentally sound - Noncorrosive, nonflammable, nonacid and noncaustic.

### PROPERTIES

Acids .....	None
Alkali .....	None
Color .....	Milky white
Effective pH range .....	5 - 10
Effective temperature range .....	50° - 100°F
Flammability .....	Nonflammable
Fragrance .....	New Green
Odor counteractant .....	O <sub>3</sub> Z
pH .....	7.0 - 8.0
Bacteria count - Aerobic .....	54,000,000/mL
Bacteria count - Anaerobic .....	54,000,000/mL
Shelf life .....	1 year
Toxicity .....	Nontoxic

### SAFETY

Keep out of reach of children. For institutional and commercial use. CAUTION: Contains emulsifiers. Undiluted product may cause eye irritation. Avoid contact with eyes. Avoid contact with open wounds. FIRST AID: If splashed on skin, wash affected areas with soap and water. Remove contaminated clothing. If splashed in eyes, flush with large quantities of water. If swallowed, drink two glasses of water. Call a physician immediately. NOTE: Do not subject product to disinfectants, hot or boiling water or chlorinated products.

### AUTHORIZATION

Authorized by the USDA for use in federally inspected meat and poultry plants. Classification C-1 for use on all surfaces in inedible product processing areas, nonprocessing areas, and/or exterior areas.

**Authorized Betco Distributor:**

### DIRECTIONS FOR USE

**Read the entire label before using this product.**

Be sure to pretest before using. CARPETS: To remove pet odors from carpets, rugs or floors, pour diluted product directly on odor spot. Leave overnight. Blot with clean, white cloth. If the odor persists, repeat. UPHOLSTERY: To remove musty odors mist the fabric. CARPET MACHINES: To deodorize carpets, add 1/4 cup each time the solution tank is refilled. RESTROOMS: To deodorize urinals and bowls, spray surfaces and surrounding area. LAUNDRY PRESPOTTER: Spray soiled areas with diluted product prior to washing. Leave overnight. DRAIN LINES AND DOWN PIPES: Use product a minimum of two times weekly to a maximum of four times depending on the usage of the building. Add product in amounts listed, starting on the lowest floor and working up at the rate of one floor every day. Do not treat the same floor twice. When the top floor is reached, continue treatment on the top floor only.

Pipe Size	Dosage	Frequency
2"	4 ounces	twice/week
4"	8 ounces	twice/week
6"	12 ounces	twice/week
8"	16 ounces	twice/week

GREASE TRAPS: For traps less than 20 cubic feet capacity, add 4 to 5 ounces of product daily by pouring in a sink or pipeline closest to the trap. This should be done at night or when the traps are used the least. After adding, flush down with a cup of lukewarm water. For grease traps larger than 20 cubic feet, add 8 to 10 ounces daily using the same procedure. SEPTIC TANKS: Add one pint per 25 cubic feet capacity for the initial treatment. Thereafter, use 8 ounces per week. Pour directly into toilet and flush. If the septic tank has become clogged and odorous, add one gallon of product directly to the tank through the manhole. MUNICIPAL SEWAGE TREATMENT TRICKLING FILTERS: Use 5 to 6 gallons per million gallons of daily flow. For preventive maintenance, use 2 gallons per MGD weekly to maintain proper operation.

### AVAILABLE IN

- Case/12 Quarts (946 mL): #13312
- Case/4 - 1 Gallon (3.78 L): #13304
- Pail/5 Gallon (18.9 L): #13305
- Drum/55 Gallon (208 L): #13355
